REACH (Registration, Evaluation, Authorization and restriction of Chemicals)

Dear Valued Customer:

Registration, Evaluation, Authorization and restriction of Chemicals, or REACH, consists of legislative framework developed by the European Union to manage the risks that chemicals may pose to human health and the environment. This framework requires industry to register chemicals used in their products with the European Chemicals Agency (ECHA).

Indy Honeycomb does not manufacture any of the substances on the ECHA list, but rather modifies and distributes the raw materials purchased from suppliers while providing value added services such as forming, welding, cutting, and machining. Our vendors continue to assess and monitor the REACH requirements as they pertain to the products we sell. As of this date, our vendors have determined that the products sold to Indy Honeycomb do not contain any significant amounts of chemical compounds on the Candidate List of Substances of Very High Concern (SVHC). Therefore, these products are considered compliant with European Union SVHC regulations.

We will continue to work with our vendors to determine how the REACH requirements will impact our business.

If you have further questions, please do not hesitate to contact us.

Respectfully,

Don Pryst
President & COO
